persons

# **PRIORITIES OF THE FURTHER VET DEVELOPMENT FOR THE NEAREST FUTURE**

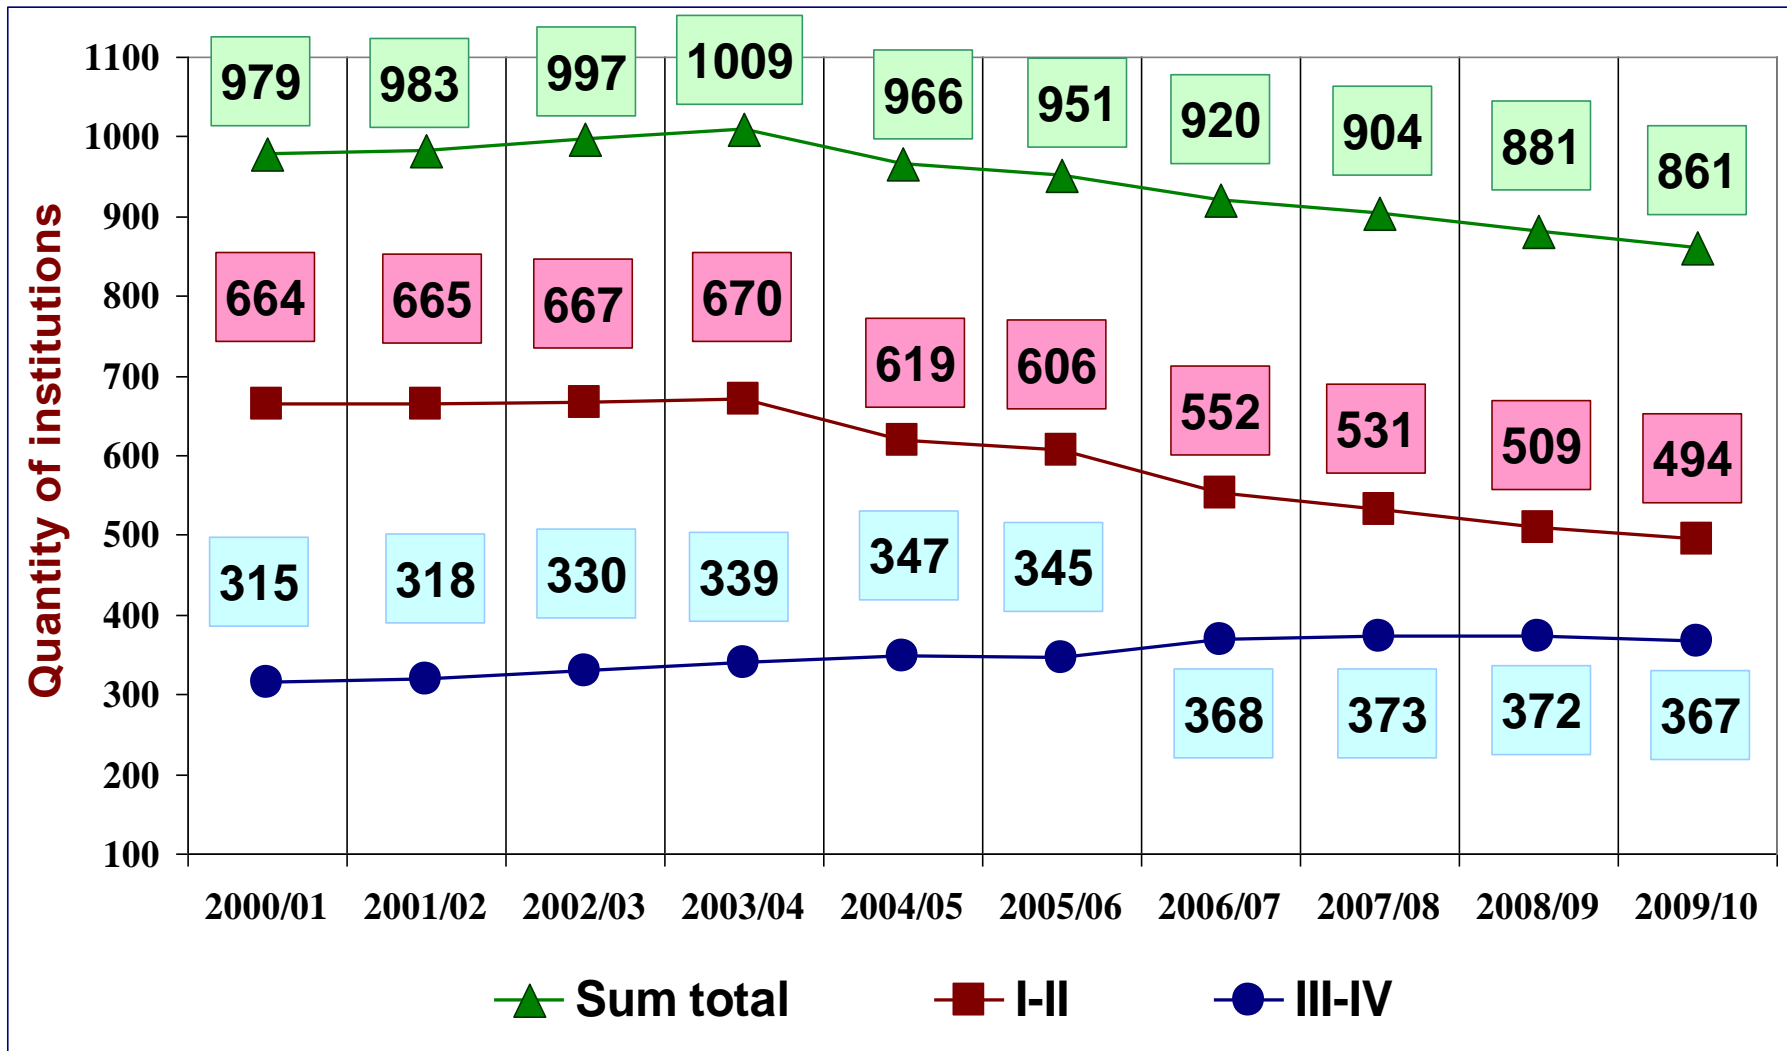

- Financing system optimisation through the transfer of managing and financing functions to the regional level
- Creating of the VET quality assurance through forming of the models of quality, working out the methodology of quality management, providing quality monitoring and assessment, quality indicators, etc.
- Modernisation of the VET managing system through the delegation of some authorities from the center to the regions
- Formation of positive image of the high qualified working profession through the improving of professional orientation of the society
- Renewing of the existing legal base in the VET sphere through the development of the legislation and working out the new draft legal acts.
